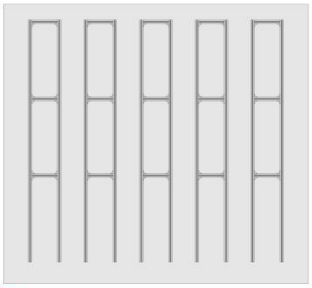
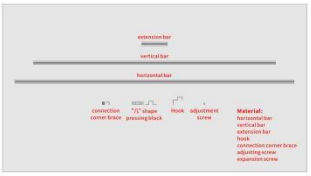
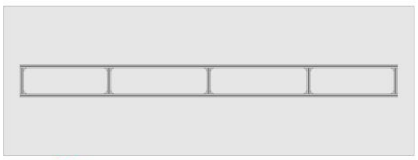
Installation steps of LCD video wall landing bracket (3 x 4 as an example):

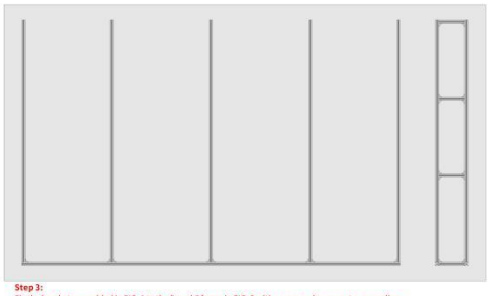


Step 1:
Assemble four shaped frames like"⊞" with hanging screen crossbar and extension bar.

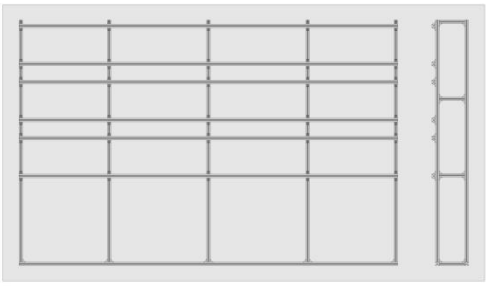




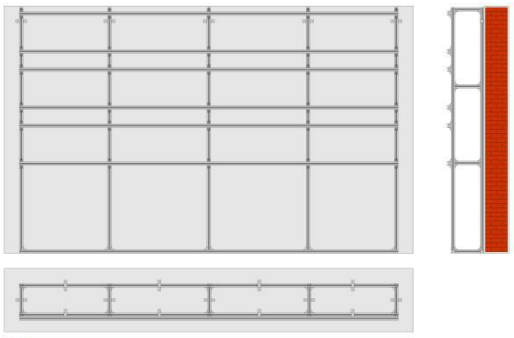
Step 2:
Assemble a shaped frame like "⊞" with hanging screen crossbar and extension bar.



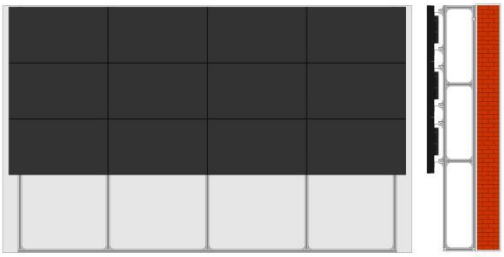
Step 3:
Fix the bracket assembled in FIG. 1 to the "mesh" frame in FIG. 2 with corner code connector according to the drawing requirements.



Step 4:
Fix the horizontal bar on the vertical bar according to the requirements of the drawing.

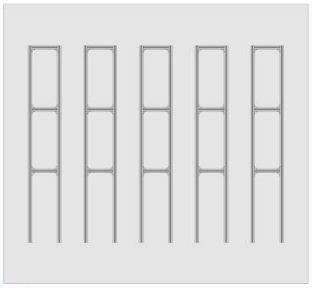


Step 5:
After the bracket is assembled, find the suitable position according to the site environment and fix it with pressing blocks. (Require installation level: flat and firm ground)

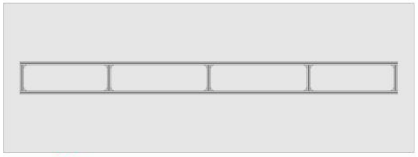


Step 6:
Install the display screen. Each display screen has 4 hooks and 3 adjustment screws for each hook. Use the adjustment screw to adjust the high, low and front and rear positions and fix them.

Installation steps of LCD video wall landing bracket (2 x 4 as an example):

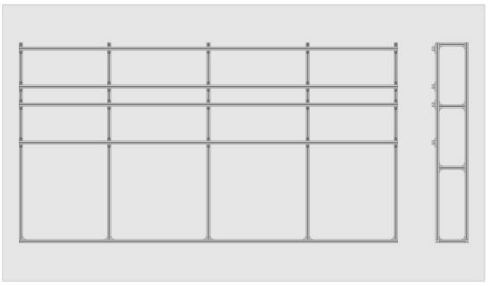


Step 1:
Assemble four shaped frames like"⊞" with hanging screen crossbar and extension bar.

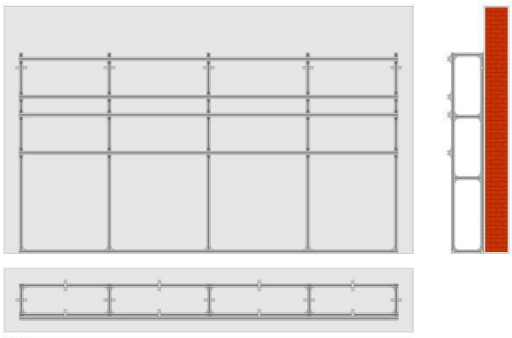


Step 2:
Assemble a shaped frame like "⊞" with hanging screen crossbar and extension bar.

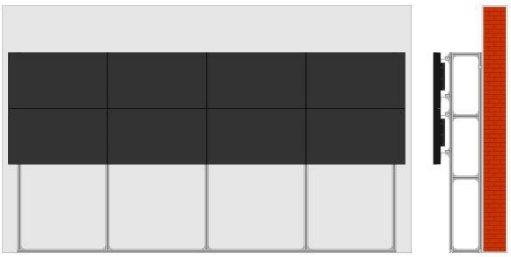
Step 3:
Fix the bracket assembled in FIG. 1 to the "mesh" frame in FIG. 2 with corner code connector according to the drawing requirements.



Step 4:
Fix the horizontal bar on the vertical bar according to the requirements of the drawing.

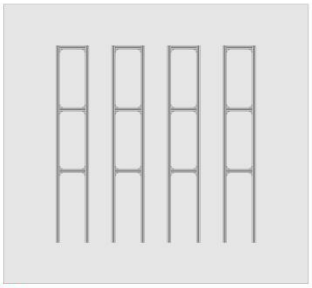


Step 5:
After the bracket is assembled, find the suitable position according to the site environment and fix it with pressing blocks. (Require installation level: flat and firm ground)

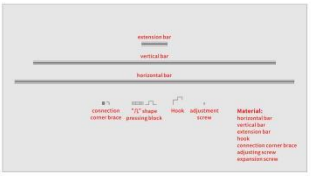


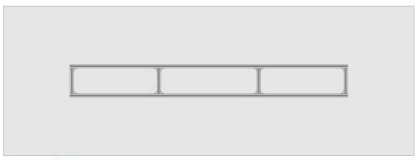
Step 6:
Install the display screen. Each display screen has 4 hooks and 3 adjustment screws for each hook. Use the adjustment screw to adjust the high, low and front and rear positions and fix them.

Installation steps of LCD video wall landing bracket (2 x 3 as an example):

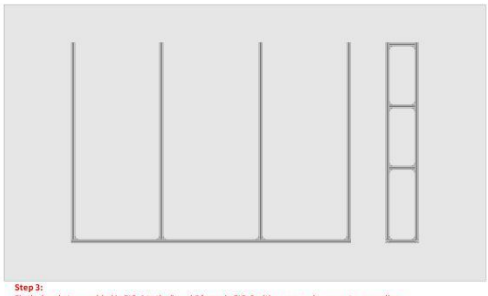


Step 1:
Assemble four shaped frames like"⊞" with hanging screen crossbar and extension bar.





Step 2:
Assemble a shaped frame like "⊞" with hanging screen crossbar and extension bar.



Step 3:
Fix the bracket assembled in FIG. 1 to the "mesh" frame in FIG. 2 with corner code connector according to the drawing requirements.
