ManDa Food

Tianjin Manda Food Science and Technology Co., Ltd

Peanuts, also known as long-life fruit. Peanut, as one of the traditional food popular with the common people. As a popular saying goes, can nourish and help prolong life, and are known as "plant meat" and "meat among vegetarians" like soybeans."Eating peanuts often can keep you healthy."

Specification

- Name： Peanut Kernel
- Grade：Best
- Max.Moisture (%)：≤5-6%
- Cultivation Type: Fresh

Consumption of scene

Made roasted seeds and nuts

Squeeze oil

Ingredients for a snack

Keeping in good health porridge

Function value

- Function 1： Peanuts contain a lot of linoleic acid, this substance can make the human body cholesterol decomposed into bile acid excretion, avoid cholesterol deposition in the body, reduce the incidence of a variety of cardiovascular and cerebrovascular diseases caused by cholesterol in the human body more than the normal value.
- Function 2： Peanut is rich in calcium, which can promote the bone development of children and prevent the occurrence of bone degenerative diseases in the elderly. Peanuts are rich in fat, oil and protein.
- Function 3: The zinc content in peanuts is generally higher than that of other oil crops. Zinc can promote the development of children's brain, enhance the memory function of the brain, can activate the brain cells of the elderly, effectively delay the premature aging of the human body, with anti-aging effect.

Typical Physical Properties

Colour	White skin , Red skin
Size	24/28 28/32 34/38 38/42
Style	Dried

Typical Nutritional Analysis

The amount of trace elements per 100 grams of red skin peanut

	Per 100g
Zn	2.03mg/g
Mn	1.44mg/g
P	326mg/g
Ka	563mg/g
Mg	171mg/g
Fe	1.5mg/g
Ca	47mg/g
Na	34.8mg/g

Wonderful anthocyanins

Eat more carefree

Healthy and delicious food is guaranteed:

Real handmade selection, a big full.

Good fruit in full sunshine and good taste in the terrain;
Crispy and greedy, long aftertaste, a hundred times the heart;
Health and safety, layer by layer control, strict selection of each delicious.

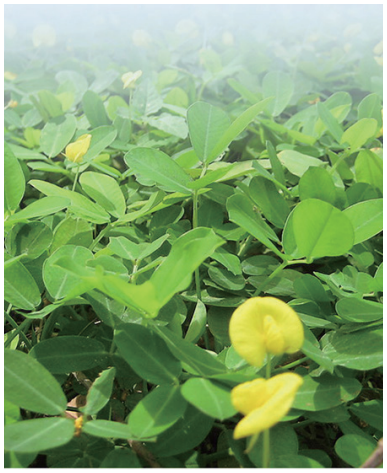
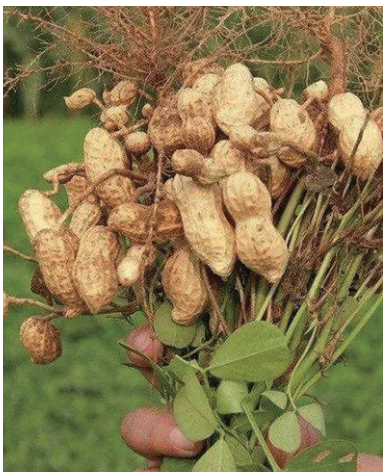
Natural health

The organic red peanut is a high level of food safety in China, which refuses to use chemically synthesized pesticides, fertilizers, hormones and transgenic technology.

This product is planted in fertile soil, high latitude, full of light, warm and rainy summer areas. The suitable rain water in this area can meet the needs of water absorption, expansion and germination of seeds. Abundant light, conducive to leaf photosynthesis, so that its strong growth. Red peanut is a sun-loving crop and grows well in a warm environment.





Warm prompt

When a red-skinned peanut is soaked, the water turns red, not because it's dyed, but because the peanut contains a natural pigment.
