ManDa Food

Tianjin Manda Food Science and Technology Co., Ltd

Soybeans are familiar with food in our lives. Soybeans are an important grain and oil agricultural products, which can be eaten and used for oil extraction. It is rich in nutrition as food. As an oil crop, it is the world's leading supplier of vegetable oil.

Specification

- Name：Soybeans
- Max.Moisture (%)：<15%
- Cultivation Type: Common
- Ingredient：100% of soybeans

Consumption of scene

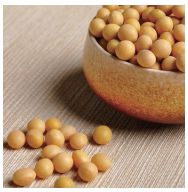
Make all kinds of soy products

To extract soybean oil

Brewing soy sauce

Protein extraction

Function value



- Function 1：Improves digestion
  Promote the digestion and absorption of the human body, accelerate the peristalsis of the intestines, accelerate the discharge of waste in the body.
- Function 2：Lower blood sugar and fat
  It contains inhibitory substances that can significantly reduce lipids and at the same time, can also inhibit weight gain.
- Function 3: Whitening skin care
  Can effectively improve skin aging, effectively prevent the synthesis of melanin, long-term consumption of soy can make the skin long, beneficial color, with beneficial Qi nourishing blood.
- Function 4: Boost your immunity
  Rich in protein, containing a variety of essential amino acids, can improve human immunity.

Typical Physical Properties

Colour :	Yellow
Size :	5-8mm
Packaging :	25kg per bag or as buyer required

Typical Nutritional Analysis

The amount of trace elements per 100 grams of soybeans

	Per 100g
Zn	3.34mg/g
Mn	2.26mg/g
P	465mg/g
Ka	1503mg/g
Mg	199mg/g
Fe	8.2mg/g
Ca	191mg/g
Na	2.2mg/g

Wonderful anthocyanins

Eat more carefree

Granule uniform;
clean skin;
no impurities insect eyes.

Organic processing, physical skin grinding and grinding process is not polished, no dyeing, retain the original fragrance, the original taste, to meet your requirements of raw materials.

ManDa Food

Tianjin Manda Food Science and Technology Co., Ltd

Natural maturity cracking

Good quality · Visible

Clean and free of impurities
Contain a variety of nutrients

No ripening: the natural cycle of growth fully absorbs natural nutrients
Fresh and active: Retained bean germ can germinate after soaking.

Falling in love with grain is all organic !

Farm direct supply, natural organic nutrition

The sunshine long

2629 hours of sunshine per year, large temperature difference between day and night, ensuring sufficient sunshine during the cultivation process.

Moisture

Sufficient water is needed during the growth period, and less water is needed during the rapid maturity period.

Good soil

Plant soil with a pH value between 6 -7.5ruit buried in the soil.

Temperature

Early germination: 6-8°,
Growth period: 15-25°.
Create the most suitable production environment for soybeans.

Wild quality

Fearless details

What you see is what you get

There is no bleaching

There is no preservatives

Refused to add

Reject faulty goods

Natural health

The unique geographical advantages give high quality: suitable temperature conditions and a long growing period for the growth of crops and the variety of grain, with sufficient riv-er water irrigation, no industrial pollution, and a certain alkaline soil, such unique conditions can produce high quality products.

At the same time, the traditional farming technology is used to plant, fully retaining its nutritional composition and edible value.No chemical fertilizer, no pesticide spraying, relying on farm organic fertilizer, pest control in a physical way, no pollution.Organic processing, physical skin grinding and grinding process is not polished.

Warm prompt

Storage: Keep in a cool and dry place, away from the sun.
