FROG JUMP

Name: Frog Jump

Location:ShaoXing,ZheJiang Province,China

DESCRIPTION OF FROG JUMP

Frog jump is a kind of amusement equipment which uses flexible parts to hang the seat for vertical lifting. The main structure includes gantry, seat and oil cylinder. The seats use the steel wire rope to bypass the fixed pulley of the portal frame to connect with the oil cylinder. Through the continuous stretching action of the oil cylinder, the tourists sitting on the seat are promoted to the height, quickly lowered, immediately elevated, and then continuously jumping up and down. , As if sitting on the back of a big frog jumping, children always love the equipment.
