102m Ferris Wheel

Name:102M Ferris Wheel
Location:NanTong,JiangSu Province,China

DESCRIPTION OF 102M FERRIS WHEEL

Ferris wheels, like the great theatres, galleries and city sculptures that have sprung up, have become must-haves for any ambitious city. Every year, the number and height of ferris wheels are almost renewed. From big cities like Paris, Tokyo, Washington and Hong Kong to the regional cities, ferris wheel has been built everywhere, regardless of its size.
The ferris wheel is a city landmark, an architectural work of art and a tourist project. In this era of rapid dissemination of information, a good product spread will be well-known immediately in the whole world. As a giant ferris wheel, the 102 meter is a great choice for both megacities and developing city which need more attention from the world.
