Product name: Black Wheat Grass Powder

Black Wheat Grass Powder Description:

As we all know, black crop products contain melanin, which has the functions of high nutrition, high nourishment, and high immunity, and its worth is doubled. The triticale in the wheat family, when it was born, added a beautiful wind and shadow on the green earth. The raw materials of our triticale powder are all pollution-free and radiation-free, and are vacuum and dried in a GMP cooperative factory, without any chemical additives and artificial colors, ensuring its original value and natural taste.

After testing by the National Grain Inspection Center, the elements contained in black wheat are: organic chromium, selenium, and zinc. It is rich in dietary fiber and protein, and its anthocyanin content is 4-6 times that of ordinary wheat. Rich in trace elements, and much higher than other black wheat and white wheat, it is the best in food.
The protein content of black wheat grass powder is basically between 17-20%, with good quality, complete amino acid variety, and the ratio model is obviously better than common wheat flour, especially phenylalanine, tryptophan, lysine and tyrosine The content far exceeds common wheat flour.

Our black wheat grass powder has a unique scent, and is the first-class ingredient for baking bread and pastries, as well as the preferred food for family staples.
