Common Questions & Answers

Q: What is TT Aligner ?

A: TT Aligner is a type of clear braces solution applied on updated digital technology and imported diaphragm materials from the United States.

After wearing TT Aligner, the teeth will be subjected to the appropriate nd controllable pressure brought by invisible orthodontic treatment, and gradually move to the ideal position in order to achieve the corrective effect.

Q: Is TT Aligner invisible?

A: TT Aligner is made of imported polymer transparent materials, which is difficult for others to notice when you are wearing it.

Q: How long is the treatment cycle?

A: Depending on the severity of the patient's dental deformity. It generally takes about 1-2 years time. About the details please consult your doctor.

Q:Does it hurt when wearing TT Aligner?

A: It is a normal phenomenon that some patients will have the teeth soreness when they first wear the invisible appliance. It means that your appliance is working. The soreness will gradually disappear in the following 3-5 days. If it is not the case, please contact your doctor in time.

Q:What should be taken care during the treatment?

A: The appliance should be worn no less than 20 hours every day. It can be removed during meals, brushing, or some important occasions.

It is recommended not to drink colored beverages to prevent caries and discoloration. It is also recommended not to drink too cold or too hot to prevent the deformation of the a ppliance.
