ROTATING HORSE

Name: Rotating Horse
Location: ShaoXing,ZheJiang Province,China

DESCRIPTION OF ROTATING HORSE

The Rotating Horse is the new amusement equipment designed by us according to the market needs and specific requirements of users. Compared with other similar products, it has many outstanding advantages: the outward appearance is smooth and natural; cabins are designed as flying horses; the decoration on the top (like a unicorn) is full of childishness. The device is a kind of amusement plane that rotates around the vertical axis. Passengers can control the cabin lift and fall independently, and can also attack the horse directly in front with their own weapons. The hit horse will fall to the lowest position immediately, and after a delay, it automatically rises again. With a certain degree of stimulation, the Rotating Horse is one of the most popular equipment for children and teenagers in amusement parks. Each cabin accommodates one adult and a child or two persons under 1.5 meters tall. Children under 1 meter tall should be accompanied by adults.

TECHNICAL PARAMETERS OF ROTATING HORSE
