Product name: Broccoli Powder

Broccoli Powder Description:

Our broccoli powder is produced by a GMP certified cooperative factory, on the basis of strict control of sterilization and disinfection, and is produced in an assembly line. It is physically pressed to retain 100% of the nutrients, without adding any preservatives and artificial colors.

The nutrients in broccoli powder are not only high in content, but also very comprehensive, mainly including protein, carbohydrates, fat, minerals, vitamin C and carotene. According to analysis, every 100 grams of fresh broccoli's curd contains 3.5 grams-4.5 grams of protein, which is 3 times that of cauliflower and 4 times that of tomatoes. In addition, broccoli is more comprehensive in mineral content than other vegetables. The content of calcium, phosphorus, iron, potassium, zinc, and manganese is very rich, which is much higher than that of cabbage flowers that belong to the same cruciferous family. Broccoli may be the most significant anti-cancer effect. Cauliflower contains more vitamin C, which is higher than Chinese cabbage, tomato, and celery. It is especially effective in preventing gastric cancer and breast cancer.

You can make breakfast cakes with our broccoli powder, which is low in calories and also brings a strong feeling of fullness. With a cup of hot milk, you can start a beautiful day!

Ingredients: Broccoli Powder

Broccoli Powder specifications: Powder 100mesh

Broccoli Powder packaging:
Inner packing: 1kg/aluminum foil bag
Shockproof bubble film is adopted to strengthen protection
Outer packing: 38*38*57cm five layers corrugated carton

Shelf life: 12 months

Storage condition: store in a cool and dry place, and use it as soon as possible after opening
